

Copper Anodized

Infinite Innovation – Infinite Benefits

Infinite Benefits

Natural, Long Lasting Beauty

Anodizing allows the natural beauty of the aluminum surface to shine through. Create durable, custom stainless alternative products by combining aluminum and anodizing finishes with various shades and finishes of brass-gold. .

Tough Performance – Low Maintenance

The durable low-maintenance anodized surface resists scratches, is dent resistant, will never corrode, flake and peel and cleans up easily with soap and water.

Reduced Weight – Enhanced Profitability

Not only do anodized aluminum products weigh approximately 60% less than copper, they can improve your production efficiencies through reduced down time with larger coil sizes, ready to use material and faster fabrication in many processes.

Environmentally Responsible

Our Copper Anodized products are 100% recyclable – making them a smart, environmentally responsible material decision.

Infinite Possibilities

Appliance panels & Trim

Infinite Savings

Imperial Gage	Metric Gage	Copper			Anodized Aluminum			Savings \$/sm
		\$/kg	Kg/sm	(A) \$/sm	\$/kg	Kg/sm	(B) \$/sm	
0.016"	0.4mm		3.576			1.085		
0.020"	0.5mm		4.470			1.356		
0.025"	0.6mm		5.588			1.695		
0.032"	0.8mm		7.152			2.170		
0.040"	1.0mm		8.941			2.713		

To Calculate Your Potential Savings:

- Enter your price per pound for both copper and anodized aluminum into the appropriate \$/lb field.
- Multiple the price per pounds (\$/lb) by the pounds per square foot (lb/sf) to get the price per square foot (\$/sf).
- Subtract (B) from (A) to view your savings.
