

LORIN STAINLESS COLLECTION

LORIN

A STRIKING LOOK THAT LASTS

Forget your perceptions. This is a new kind of stainless. The

Lorin Anodized Stainless Collection. Polished, Powerful, and prepped to reflect any vision worth believing in. That's the beauty of Lorin Anodized stainless. Beautiful and elegant.

REFLECT YOUR VISION

FEATURES & BENEFITS

NATURAL BEAUTY Our Lorin Stainless collection offers a variety of Stainless finishes from a beautiful short line brush, to an elegant long Line brush, for that exemplary reflective look that draws you in. Don't settle for just any ordinary stainless, demand Lorin Stainless Anodized Aluminum.

LUXURY PERFORMANCE Stainless Anodized Aluminum won't chip, flake, or peel, and will never corrode or patina. It is durable, resists scratches and finger prints, and requires very minimal maintenance, just occasional soap and water.

READY TO FORM & PUNCH Lorin's Stainless Anodized Aluminum Collection can provide the perfect complement to a variety of applications, from paneling, exterior wall cladding, backsplashes, column covers, decorative trim and many more aesthetic product applications. It is easy to form and requires less work.

SLIM, SOLID, & STRONG Lorin Stainless Anodized Aluminum weighs 60% less than Stainless Steel while still providing you with sufficient strength and improved ease of use, as well as natural good looks.

FROM THE EARTH The Lorin Stainless Collection is 100% recyclable making it a smart, environmentally responsible material decision. For those of you who are concerned with the environment, or LEED, let Lorin Stainless Anodized Aluminum help you ...

WHAT MAKES OUR STAINLESS ALUMINUM ANODIZED FINISH BETTER?

The look ... Stainless Steel does not offer the exquisite look that Lorin Stainless Anodized Aluminum does. When you look at Lorin Stainless Anodized Aluminum you can see the rich hues of bronze or grey and the deep metallic reflection, depending on the color you choose. Lorin's anodized stainless finish is not a coating. Coatings just wear away. Anodizing is an electro-chemical process that builds an anodic layer from the aluminum, thus protecting the aluminum from the elements. On exterior finishes the colors won't fade, nor will any of the finish chip, flake, or peel. All while looking absolutely beautiful.
