

# LORIN COPPER COLLECTION

**LORIN**

## A STRIKING LOOK THAT LASTS

Forget your perceptions. This is a new kind of copper. The Lorin Anodized Copper Collection. Polished, Powerful, and prepped to reflect any vision worth believing in. That's the beauty of Lorin Anodized copper. Beautiful and elegant.

REFLECT YOUR VISION

---

## FEATURES & BENEFITS

**NATURAL BEAUTY** Our Lorin Copper Collection offers a variety of copper shades, but the best part is that the color won't patina or fade, thus ensuring you will always have that beautiful copper look forever.

**LUXURY PERFORMANCE** Anodized Aluminum Copper doesn't chip, flake, or peel, and will never corrode or patina. It is durable, resists scratches, and requires very minimal maintenance, just occasional soap and water.

**READY TO FORM & PUNCH** Lorin's Aluminum Copper Collection can provide the perfect complement to a variety of applications; ceiling tiles, paneling, exterior wall cladding, backsplashes, column covers, decorative trim, and many more aesthetic product applications. Anodized aluminum is easy to form and requires less work than other metals, including copper itself.

**SLIM, SOLID, & STRONG** Lorin Anodized Copper weighs 60% less than real copper and painted steel products providing you with strength and ease of use, as well as natural good looks.

**FROM THE EARTH** The Lorin Copper Collection is 100% recyclable making it a smart, environmentally responsible material decision. For those of you who are concerned with the environment, or about LEED, let Lorin help you ...

## WHAT MAKES OUR ALUMINUM COPPER ANODIZED FINISH BETTER?

The look ... Lorin's Copper Collection offers a variety of Copper shades to match a multitude of looks. True copper patinas after a few years, thus the original copper color you like disappears and changes into browns and/or greens based upon your environment. Lorin Copper Collection Anodized

Aluminum stays the same and looks just like it did the day it was purchased. Anodizing is an electro-chemical process that builds an anodic layer from the aluminum, thus protecting the aluminum from the elements. The color won't fade and the finish won't chip, flake, or peel. All while looking absolutely beautiful.

REFLECT YOUR VISION.
